

## Gutmann Funds Service

A Gutmann Digital feature

What is the Funds Service?

The Gutmann Funds Service is an online platform providing comprehensive information on Gutmann's retail funds. Gutmann KAG's previous website [www.gutmannfonds.at](http://www.gutmannfonds.at) has been redesigned and updated:

- The Funds Service is integrated into the Gutmann KAG website under the menu item "FUNDS"
- Pages providing fund details are user friendly and designed for intuitive use
- A search and filter function makes it easy to find funds
- Information is structured to provide details as appropriate for the type of fund concerned
- Context sensitive help functions make it easy to understand the information provided
- User-friendly access from all types of terminals made possible by responsive design
- Subscriptions to fund documents can be managed by users independently

What added value does the new Funds Service offer our clients?

While the Funds Service has so far been primarily a source of information for data providers, it has now been designed to serve in the future as a comprehensive and user-friendly information platform for those of our private clients who are invested in Gutmann retail funds:

- Fund details are presented in an easy-to-read and attractive format
- All information items, fund documents and performance time series are available for downloading
- Clients can register for and manage their subscriptions to fund documents independently at any time

The Funds Service is an important step in the Gutmann Digital Project, which will take the Bank into the new digital world and present our fund products effectively.

How do you like the new digital Gutmann world? We would be happy to receive your feedback by email to [FeedbackGutmannDigital@gutmann.at](mailto:FeedbackGutmannDigital@gutmann.at)
